

A faceplate is a structural element (typically wall mounted) used to hold telecommunications connectors in the work area on which horizontal or outlet cable terminates.

The faceplate features a stylish, functionality and easy-to-install design suitable for data and voice application

2013AK Series Labely Type Single-gang & faceplates are ideal for the installation of keystone jacks, data, voice and A/V connectors, available in 1~12 ports.

Includes Self Adhesive Labels (one per port) for Station & Service ID
